# Hardeep Singh T1A2

Portfolio Website

# Site Map

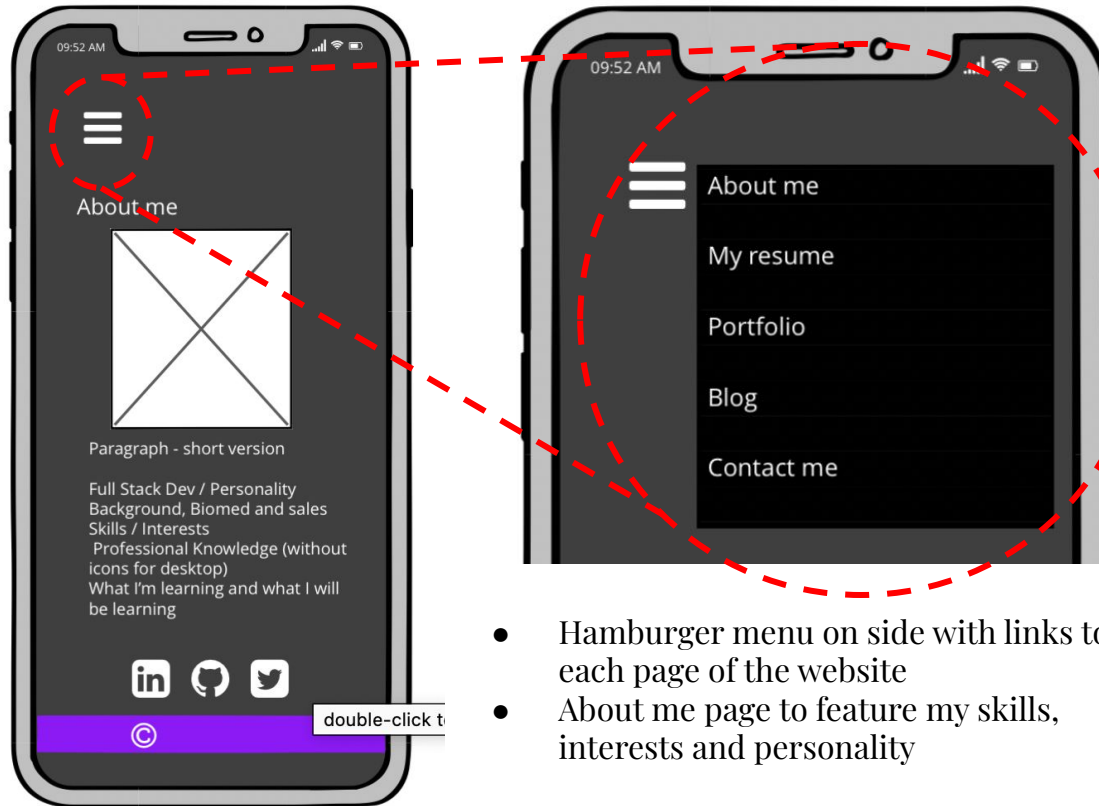

---

# Design Process

- I wanted to create a simple yet stylish website, with elements of complexity
- Header and Footer are all in the theme colors so that they prominent and easy to locate
- A chevron clip-path was used to style the images to make the website standout
- All Portfolio links open in a new window so that the user can easily navigate back to the website
- Purposeful and concise content
- Responsive to different viewports

# Mobile first ~ About me page & navigation

- Black background with Aliceblue text
- Header and footer to be in gradient theme colours
- Every page to have a uniform hamburger menu when viewing on a phone
- Every page to have a footer in the colour theme with a copyright mark in every type of viewing port

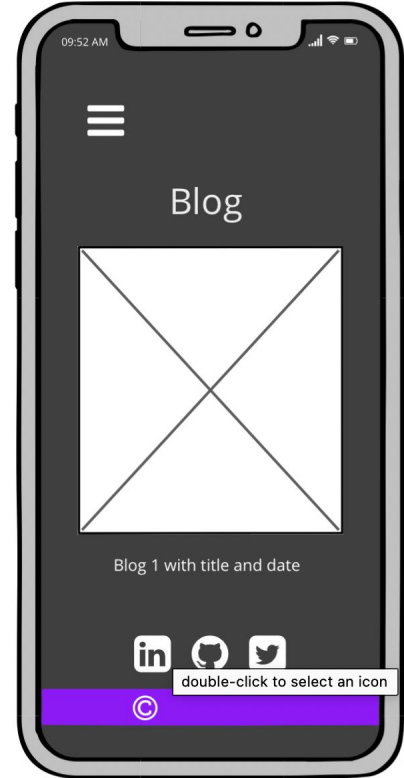

Website to include following pages:

1. About me
  2. My resume
  3. Portfolio
  4. Blog
  5. Contact me.
- Hamburger menu on side with links to each page of the website
  - About me page to feature my skills, interests and personality

# Blog and Portfolio Pages

- 6 x <section> to hold images related to the external website link, in the shape of a chevron, wrapped in anchor tags
- 6 dummy blogs on the blog page with dates and titles
- One chevron wide on page when viewing on phone

# Colour theme & Chevron shaped Images in action

## Portfolio

[About me](#) [My Resume](#) [Portfolio](#) [Blog](#) [Contact me](#)

### About Me

*Student | Mum | Gardener | Musician |  
Full Stack Dev*

Having formally studied Biomedical Sciences at Kings College London and graduating at the peak of the GFC, found myself in Sales for 7 years followed by another 7 as a stay at home parent. I possess a variety of skills such as negotiating with CEOs of multi-million dollar companies and more dauntingly 3 year olds who don't want to take their naps. On a serious note, I am excellent at understanding clients needs, negotiating win-win solutions where required and producing stand-out results. I am an excellent communicator and I believe this starts with listening first, understanding the problem before providing a solution. I'm great at handling objections and building a rapport with clients and colleagues alike.

I used to play the Sitar, which has unfortunately taken a back seat since having children. However, I still enjoy dabbling on a keyboard and coding along to musical Sitar pieces in the background. My newest hobby, which I discovered during lockdowns, is gardening. Never did I imagine, that I would enjoy gardening and find it relaxing.

I am a Mum to 3 young kids who have been the center of my universe since 2014, therefore a big part of my identity. This past year, I have been working on small projects to find out who I am. These have included volunteering, freelancing as an Event Planner for clients who needed to plan quick weddings (thanks covid). An most importantly learning. Learning to grow certain plants, learning to balance work and family and Learning to Code.

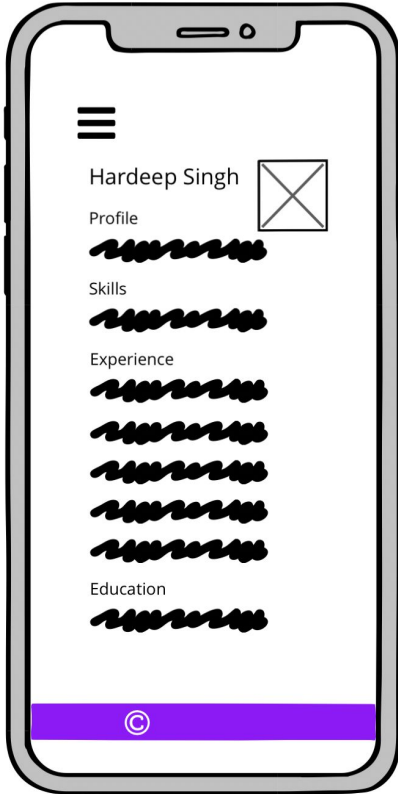

My coding skills

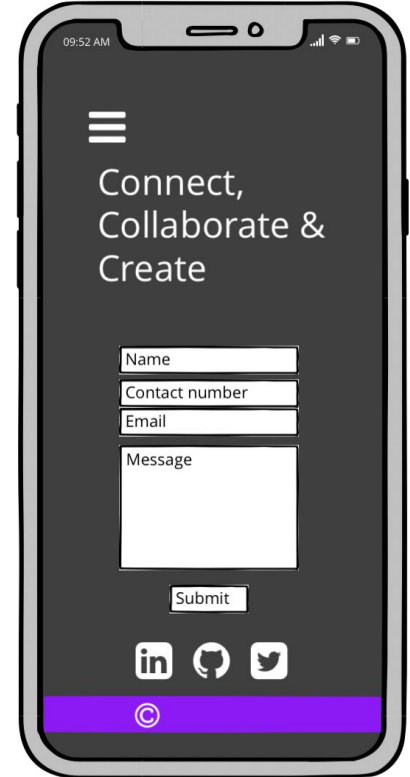

In the next 6 months I will be learning Ruby, Strings, Variables, Source Code, Control Structures, Arrays, Iterators, Modules, Gems, Objects/Classes, Error Handling, Project Management, Test Driven Development (TDD), Testing, Software pattern - (MVC) Rails, Controllers, Views, SQL, Models, Migrations, Relations, Authentication, Payment processing, Rails API, Javascript, Control Structures, Loops, Objects, Prototypes,

# Resume and Contact me page

- A page with my existing CV
  - CV needs to be updated every few months to include any new skills and experiences
- 
- A form for the users ease to get in touch
  - Form to be reactive and animated
  - No images on this page for ease of use and therefore a better UX

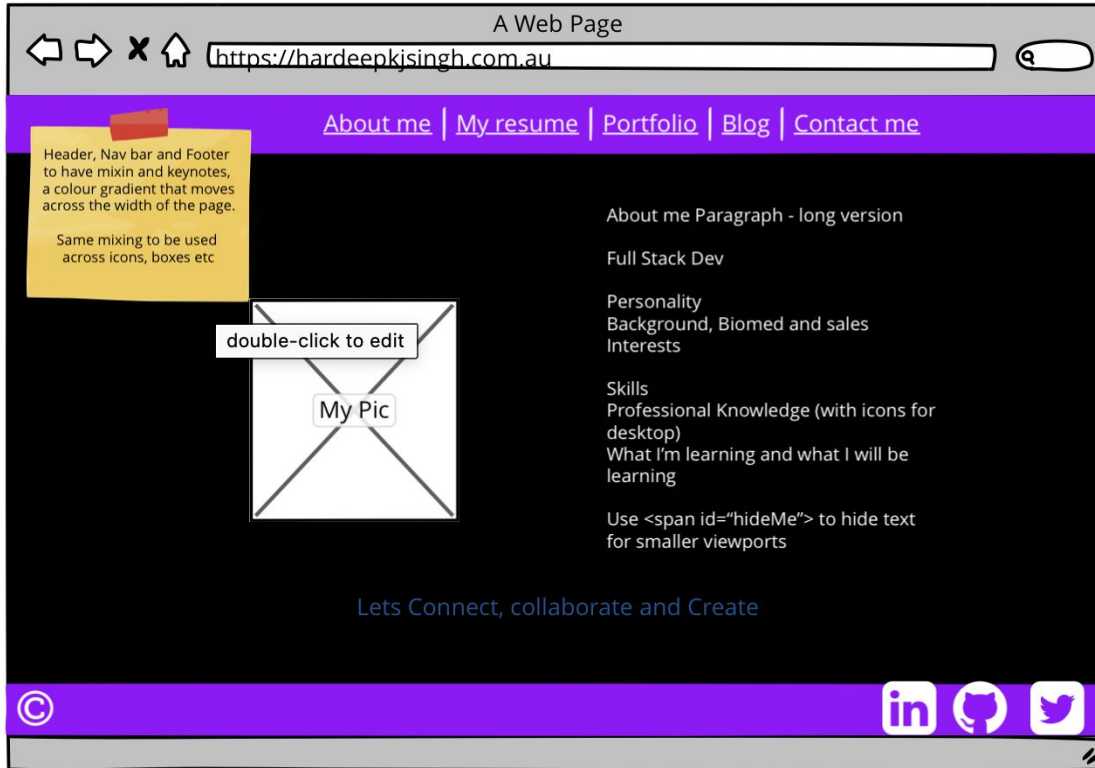

---

# Components

- Primary **navigation** located in the same location for every page with a hamburger menu in mobile view to save on space
- Header and footer located at top and bottom respectively, of every page.
- Each webpage is to have a title with Hardeep/Singh in it
- Media queries for responsiveness
- Visuals to include a profile picture of me, relevant images related to the webpages & blog page titles, most images to be in the shape of chevrons across all pages
- Blog - to drive traffic through to the site

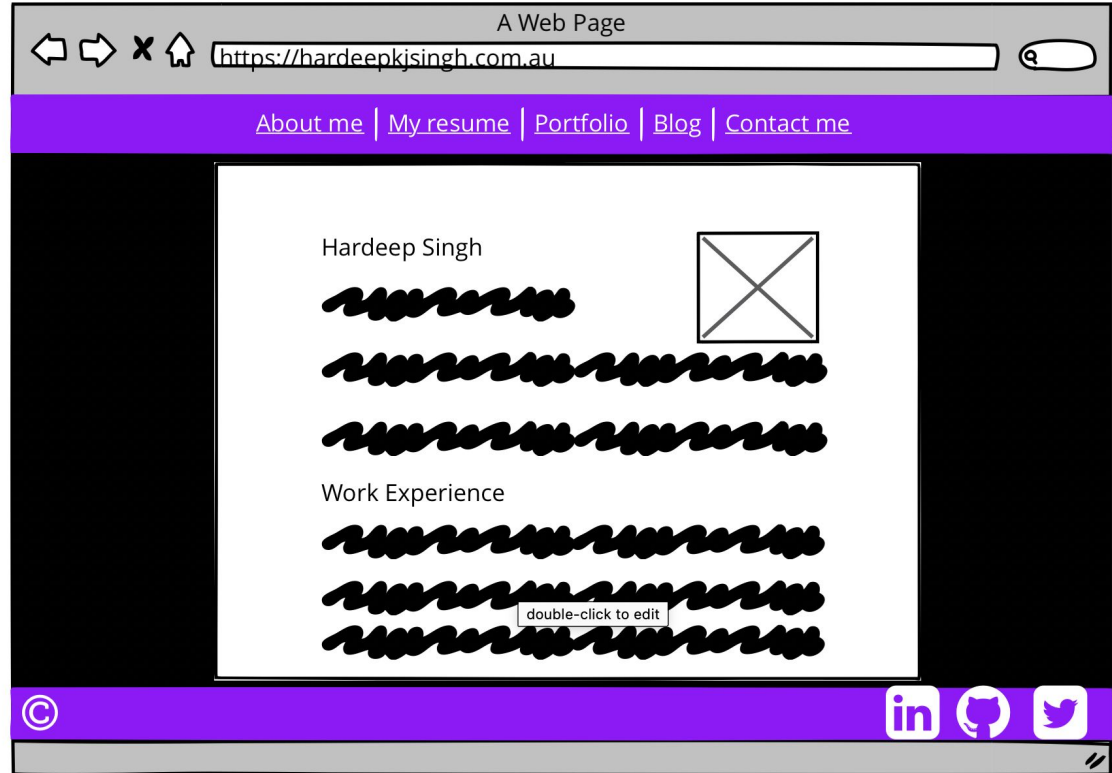

# Desktop view - About me page

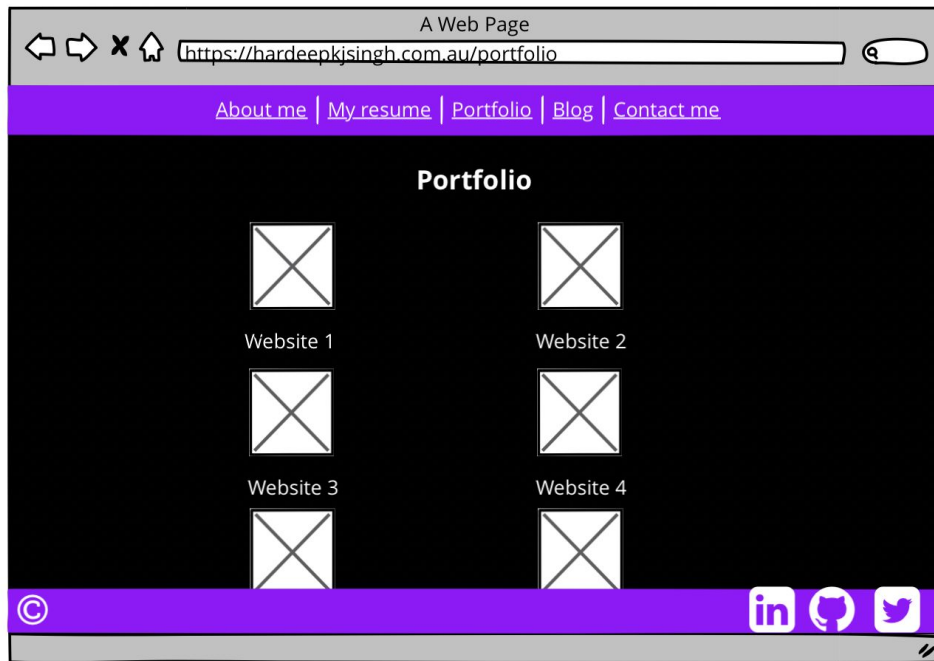

- Chevron shaped profile picture, animated to translate onto the page like an arrow
- Black background with Aliceblue text for a simple yet stylish look
- All webpages will have a uniform nav bar, located in the same location for ease of use
- All webpages will have a footer at the bottom which holds the copyright mark and links to social media
- All headers and footers will be in the colour theme gradient, to stand out on the page and a better user experience

# Resume page

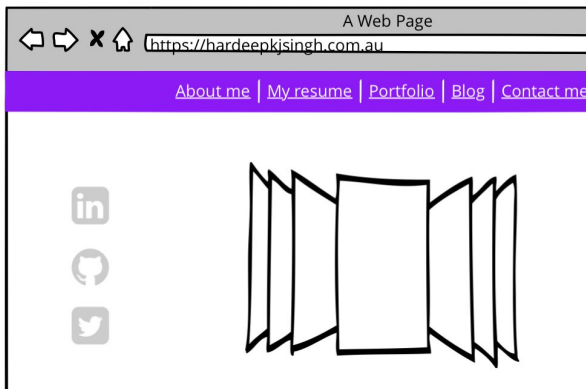

- PDF of my CV which will be downloadable for ease of use, especially by potential employers
- Resume to have hyperlinks where appropriate

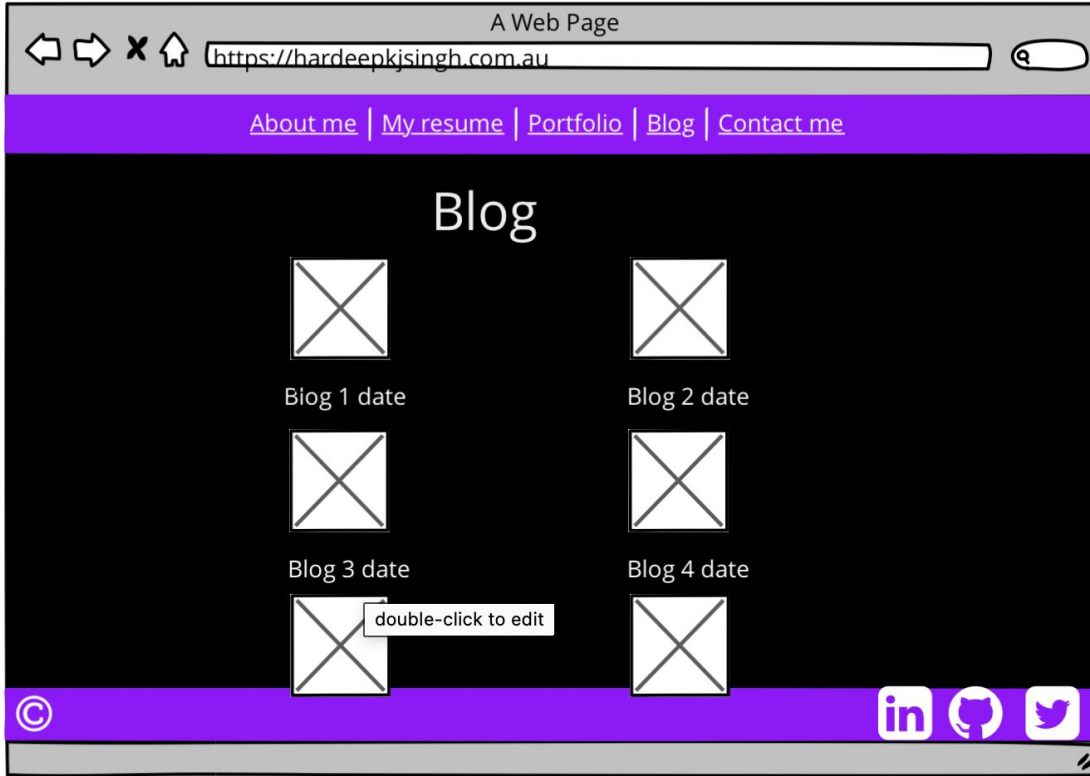

# Portfolio page

- There will be 6 links to previous created web pages
- The links will wrap an image related to the webpage as well as descriptive title
- The weblink images will be in the chevron shape
- The chevrons will be animated to translate onto the page like arrows

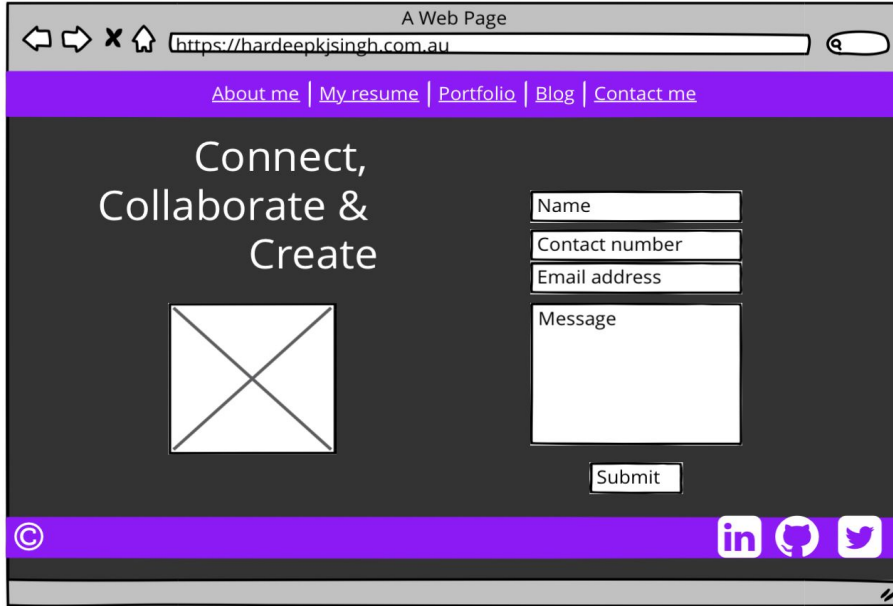

*Future project: create a cover flow of webpages for the portfolio*

## Blog page

- There will be 6 links to dummy blogs
- There will be images related to the dummy titles, the images will be wrapped in hyperlinks and shaped like chevrons
- The chevrons will be animated to translate onto the page like arrows
- Reflect the portfolio page in style

# Contact me page

- A simple form will make it easy for the user to get in touch, the name, contact number and email address will be a requirement
- A generous textarea will allow the user to send an optional message
- Continuing the chevron theme, an image will be animated to translate onto the page like arrows

---

# Challenges

I struggled to stop trying to add sprinkles to the website, for example:

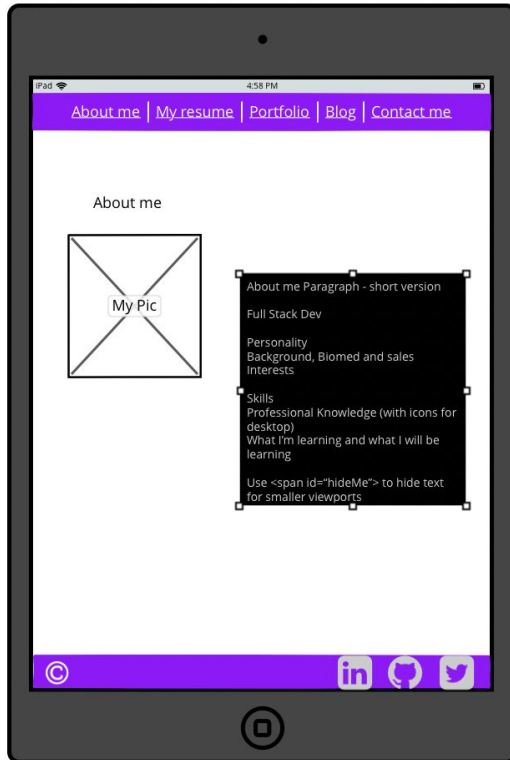

- Hamburger menu
- Cover flow
- A border in the color theme that shimmers around the chevrons
- Layout/flexbox (I was regularly battling my footer)

These are all projects I can work on in time

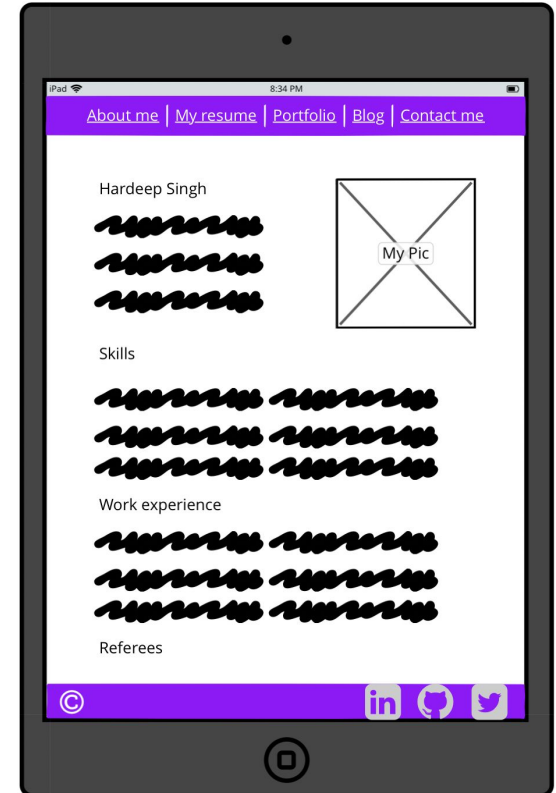

# Achievements

- The color theme class which was used in the header, footer, images and a variety of other tags to be styled in future
- Making the website stand out by using the chevrons

# Portrait Tablet view ~ About me & Resume pages

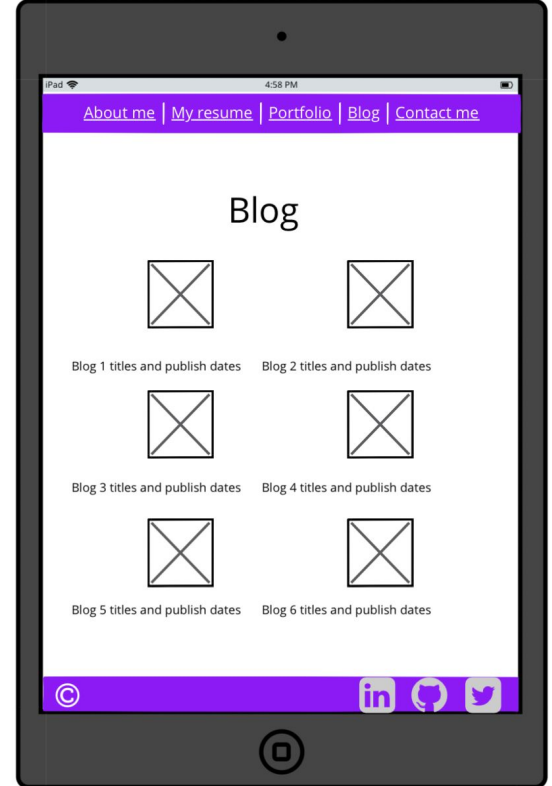

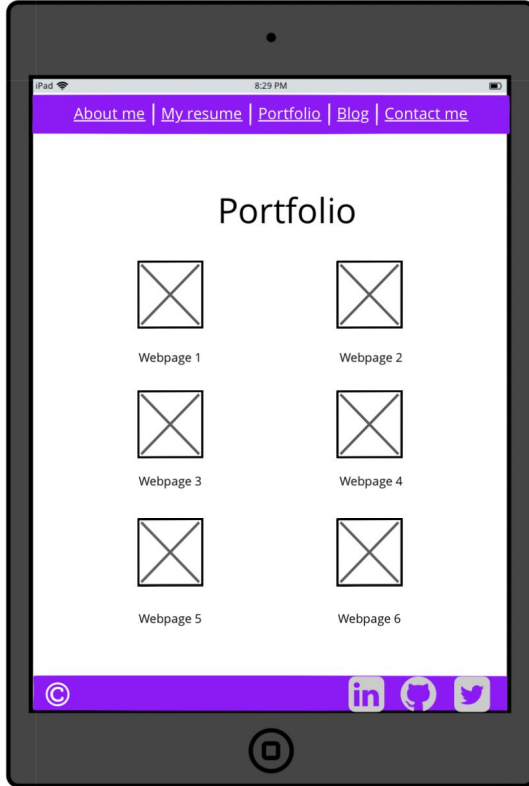

- The header at the top and footer at the bottom span the screen width and standout again in the color theme
- The footer will hold my social media links on every page

# Portfolio and Blog Pages

- The portfolio and blog pages are again reflections of each other

# Contact me page

- A simple contact me page without an image

---

# Ethics

- Ensuring accessibility by including alternative text for images and semantic HTML
- Built responsively for mobile, tablet and desktop
- In consideration of my peers and educators, I have added comments in my code to section out the different pages in the stylesheet to make it easier to navigate
- Copyright of images, where possible I have used my own images.
