- Ruby
- Ruby on Rails
- Javascript
- React
- PostgreSQL
- Git & Github
- MongoDB
- Nodejs

ABOUT ME

Emerging Software Engineer, experienced in building simple yet responsive apps using Rails, Javascript and React. Utilising Agile methodologies when working as a team and always striving to keep the code dry, easy to navigate and understand. Currently seeking an opportunity to grow real-world development skills.

Dynamic and highly resourceful professional, with sales experience in Australia as well as the UK. Adept to challenging environments, with the ability to absorb and execute new ideas and strategies.

Demonstrating initiative and self-motivation to exceed professional and personal targets. Responds positively to pressure and uses an analytical yet flexible approach combined with lateral thinking to generate effective solutions.

KEY PROJECTS

• Portfolio Website

A basic website created using HTML & CSS to showcase my work experience and projects.

• Terminal App

An interactive terminal app created using Ruby and GEMS to show an understanding of the Ruby language and my ability to plan and implement a simple calorie counting app.

• Weather App

Created in a team of 4 in response to a hackerthon, using HTML, CSS & Javascript. This app uses an API to show the user the weather in any location in Australia.

• Toy Trader

A marketplace app created Ruby on Rails, with user authentication, seller and buyer capabilities and image upload.

• Drum Pad

We created a drum pad app using HTML, CSS, Javascript & React in response to a hackerthon. This used audio files and material UI for styling.
